

SAFE & SECURE

Your data is always safe, whether you are able to delete your data or not, we securely permanently delete all device data with government grade technology.

PERFORMANCE ANALYSIS

In addition to permanently deleting all the device data, the device is thoroughly tested and analyzed to ensure you get maximum device value if you are trading it in.

CERTIFIED

Our industry-leading device data wipe is backed by a certificate of compliance, ensuring that the device has been completely and permanently wiped. A certificate is issued for each individual device and available to our customers.

Device Data Wipe Process

Using government-grade tools and processes, Evergreen Wireless adheres to the strictest industry standards for permanently removing data from previously used devices. Once the data is completely and successfully wiped from the device, the device goes through rigorous and thorough functional testing and analysis.

These processes are crucial to ensure that any issues or faults are identified and to guarantee that customer information is protected and erased.

Industry-leading **Blackbelt360** software tools are used to perform these processes. A detailed report, including all testing results and data erasure confirmation is issued for each individual device, including a final certificate of compliance.

Blackbelt 360 – Data Wipe

- Device erasures follow the R2 requirement-NIST 800-88, to secure data wipe and ensure that no customer information remains stored in the device.
- After data wiping the device, data cannot be recovered even if attempting to use data recovery software.
- Blackbelt 360 backs up their wiping process by providing the data wipe certificates with QR for quick access of the results.
- Constantly downloading the latest firmware for IOS devices and updating the software upon data wipe process.

Blackbelt 360 – Testing and Analysis

- All functionality and performance of the device is thoroughly tested.
- A report detailing the test results, and a certificate of compliance is issued for each device. A QR Code link is included on the certificate for access to the detailed results.
- Multiple devices can be tested simultaneously to ensure timely reporting of results and garner overall process efficiency for each customer.
- Evergreen Wireless retains records of the device results for future reference and customer inquiries.
